SCHOOL OF INFORMATION TECHNOLOGY

Instructional Material (Laboratory)

WEB DESIGN 1
(ACTHUM1)

Topic(s):	**Introduction to HTML, Navigation, and Image Formatting**					
Laboratory Activity No.	**08**			**No. of Hours:**		**30 minutes**
Start Date:	**March 06, 2026**			**Due Date:**		**March 06, 2026**
Approach:	☒	Individual	☐	Group		
	☐	Online	☒	Onsite	☐	Hybrid
Name(s): *Lastname, First Name Arranged in alphabetical order*						

I. Prerequisites

Students should have:

a. Knowledge of the Anchor (`<a>`) tag and the `href` attribute.
b. Understanding of file paths for internal site navigation.
c. Knowledge of HTML form elements (`<form>`, `<input>`, `<textarea>`) and CSS layout techniques.

II. Learning Objective

At the end of this laboratory activity, the student must have created a functional, well-structured HTML webpage titled "Student's Lastname/Chosen Name Creatives". The output must demonstrate the student's ability to use navigation bars, formatted circular images, and centered layout designs.

Learning Objectives	Aligned Course Learning Outcomes (CLOs)
1. Construct a functional navigation bar with an active state (Home, About, Gallery, Contact)	CLO 3
2. Implement a multi-column contact page layout with text and form elements.	CLO 3
3. Create a visually balanced landing page with a Call-to-Action button.	CLO 3

III. Setup and Procedure

Mandatory

Software Environment:

- Visual Studio Code, Notepad++, or Notepad

Hardware Environment

- PC/workstation

IV. Problem/Procedure

Annex A for the problem description.
Annex B for the detailed procedure.

V. Additional Instructions

a. **Filename (HTML):** You must follow the naming convention. Activity Number,Lastname- Folder. b.

Template Requirement: Do not forget to use the provided template to include your activity output/screenshot, the source code, and your reflection.

c. **Submission Method:** Submit the final `.html` file to the designated laboratory drive or as specifically instructed by your faculty. Remember that you already have your index and about page, this has an individual folder (for checking purpose) just copy paste what you have started as it all connected.

VI. Rubric/Scoring Guide

Criteria	5 Points (Excellent)	3 Points (Good)	1Points (No Effort)
Navigation Bar	All 4 links are present and styledwith "Contact" as active.	Missing 1-2 links or styling is inconsistent.	No navigation bar present.
Image Formatting	Form includes all required fields and a styled submit button.	Form is present but missing fields or labels.	Form is missing
Deployment & UX	The card is centered with a light shadow and clear two-column alignment.	Elements are present but alignment is off	The layout is disorganized.
Saving Req.	Correct filename and live deployment link provided.	Saved as .html but the naming is wrong.	Wrong file format.
TOTAL			__ / 20 Points

VII. Reflection

In this section, you will write a brief reflection on your learning. Answer the following guide questions:

1. Why is it important to use clear labels and placeholders in a web form?

lear labels and placeholders in a web form are important because they help users understand

what information to enter, reduce mistakes, and make the form easier and faster to complete.

2. How does a two-column layout help in organizing different types of related information on a single page?

A two-column layout helps organize different types of related information by dividing the page into sections, making the content easier to read, scan, and understand.

- **CSS Image Formatting.** Documentation on `border-radius` for creating the mandatory rounded image effects.

ANNEX A

Problem

Instructions: Create a "**Get In Touch**" contact page for "Jhazianne's Creatives" featuring a professional header and a two-column content card.

Constraints:

- **Header:** Must contain the brand logo and name "Student's Lastname Name Creatives" in uppercase.
- **Navigation:** A dark navigation bar with "HOME", "ABOUT", "GALLERY", and "CONTACT" links. The "CONTACT" link must be highlighted as the active page.
- **Layout:** A centered white card divided into two main sections: **Contact Details** (left) and a **Message Form** (right).
- **Contact Details Section:** Must include email, studio address, and business hours. ● **Form Section:** Must include labeled input fields for Full Name, Email Address, and a Message box. ● **Button:** Include a black "SEND MESSAGE" button at the bottom of the form.
- **Footer:** A black footer with the text "© 2026 Student's Lastname Name Creatives | All Rights Reserved".

.

ANNEX B

Procedure

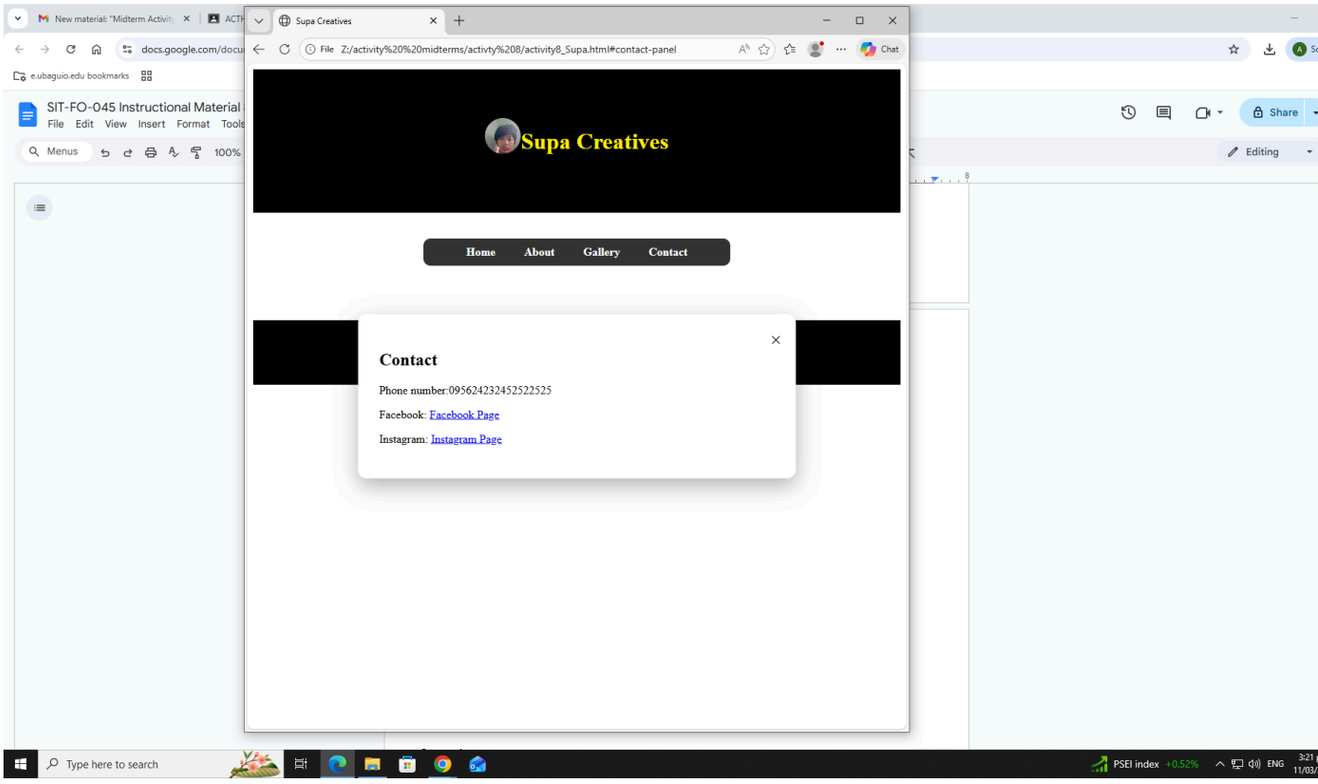
Procedure:

- **Document Setup:** Start with `<!DOCTYPE html>` and the `<html>` tag.
- **Head Section:** Include a `<title>` tag with the text "Jhazianne's Creatives".
- **Header & Nav:** Create a `<header>` for the brand name and a `<nav>` section for the four menu items.
- **Main Content Card:** Use a `<div>` with a white background and rounded corners to hold the text and circular image.
- **Image Formatting:** Use CSS (`border-radius: 50%`) to make the profile image perfectly round.
- **Footer:** Add the copyright information at the bottom of the page.
- **Saving:** Format as `.html` and use naming convention `Activity6_[YourLastName].html` or `index.html` for GitHub.

Final Submission Format Reminder

As per the mandatory instructions in SIT-FO-045:

- Required Sections:
    1. **Activity Output** (Screenshot of the live site)



2. **Activity Code** (The full HTML/CSS source)
3. **Activity Reflection** (Answers to the guide questions)

1. Why is it important to use clear labels and placeholders in a web form?

lear labels and placeholders in a web form are important because they help users understand

what information to enter, reduce mistakes, and make the form easier and faster to complete.

2. How does a two-column layout help in organizing different types of related information on a single page?

A two-column layout helps organize different types of related information by dividing the page into sections, making the content easier to read, scan, and understand.
